

Azentio Factoring

InfoMaker

Reports for leveraging risks, opportunities

Well-designed reports stimulate well-defined actions. Smart reports empower the decision-maker with intelligent data to drive revenue and operational improvements. Insightful reports are fundamental to better understanding of risks and opportunities and to make eventual choices that optimize resources and maximize profits. Reports can constructively influence business plans and strategies. They help compare performances, flag probable problems, allow decisions to be more fact-based rather than be centered on instincts and speculations.

InfoMaker is a flexible custom report writer, used along with Azentio Factoring a.k.a. Factor/SQL®, a leading factoring software solution. It gives you the advantage of extracting real-time custom reports and graphs from the live data of Azentio Factoring – in a variety of formats.

The InfoMaker edge
